BIS3005 Quiz Week 10

In this assessment, 15 questions to be completed by the due date

---

1 Multiple Choice   1 point

Mavis wants to develop an application that can talk to one of the cloud-based services her company uses. As part of the design process, she needs to take into account the structure and type of messages that are sent back and forth from the service. Which of the following describes the endpoint that her application will be communicating with for that service?

○ ANSI

○ ACPI

○ API

○ ASCII

---

2 Multiple Choice   1 point

Merlin wants to create a new script that will communicate with several of his CSP's APIs. Which of the following scripting languages might he use to create the script?

○ Python

○ YAML

○ JSON

○ XML
